

VIZIT^{sp}

Document Viewing & Imaging for SharePoint

Vizit SP™, the document image viewer for SharePoint, enhances your document management experience. With Vizit SP™ you can view, index, clean up, and annotate document images with its intuitive web-based interface.

Completely integrated with SharePoint, Vizit SP™ brings powerful imaging functionality to your browser, replacing costly traditional enterprise content management (ECM) software at an affordable price.

How Vizit Can Improve Your Work

- **Find what you need—fast.** Don't waste time searching for an invoice or purchase order using just a file name. By previewing documents before opening or downloading them, you can be sure you have the right file every time.
- **Index and review instantly.** Add and edit document properties, perform quality assurance, review, and approve documents from any browser.
- **Work on scanned and faxed images without leaving SharePoint.** Vizit SP is 100% web-based and integrated inside of SharePoint. No need to download the document to launch a client viewer.
- **Collaborate and communicate.** Leave notes, comments, and other annotations on files to collaborate and communicate with others in your work group.
- **Clean up scanned and faxed documents.** De-skew, de-speckle, and perform a host of other document-imaging functions on TIFF image file types.

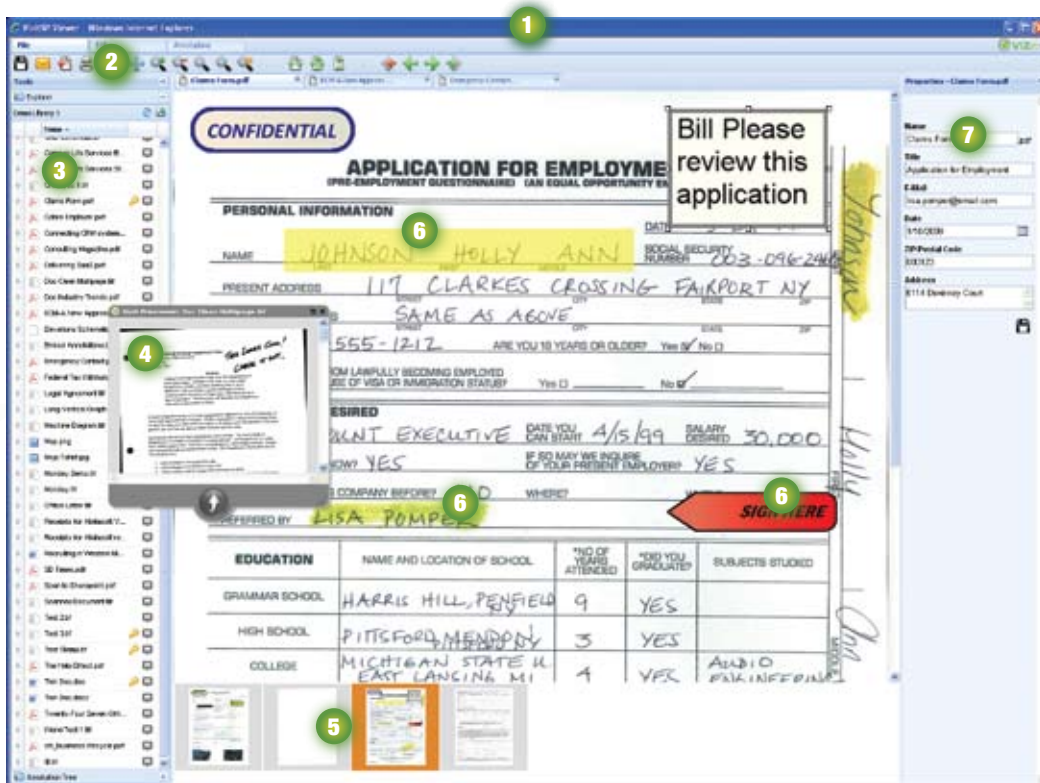

Vizit SP

Turn your SharePoint server into a configurable and affordable document management solution. Vizit SP™ enables you to work on and annotate documents directly in SharePoint to help increase productivity and enhance collaboration. Using Vizit SP™ with SharePoint can also dramatically reduce the cost of ownership of imaging solutions by replacing legacy desktop software, and costly and complicated proprietary enterprise content management (ECM) platforms.

For example, Vizit SP can increase productivity for:

- Legal and finance departments, by facilitating the processing, indexing, review, and approval of records—without downloading any of them
- Engineering and design companies, by providing browser-based annotations on CAD and other large-format documents
- Medical-records management, by supplementing the privacy compliance functions already built into SharePoint

- | | |
|-----------------------------------|-----------------------------------|
| 1. Full document image viewer | 5. Document page thumbnail viewer |
| 2. Cleanup features | 6. Various annotations |
| 3. SharePoint repository explorer | 7. Properties editor |
| 4. Document previewer window | |

What our customers say:

"This is an exciting partnership" says Robert D'Oria, BlueThread, Inc.'s CTO and Sr. Principal. "After a rather lengthy and detailed evaluation of several imaging vendors, we are pleased that we can offer a viewer product that delivers the performance and functional capabilities our Fortune 5000 clients demand."

How Vizia SP Saves You Time

- The fast preview tool saves time when searching for documents.
- Instantly open TIFF, PDF, Microsoft Office™, and other documents in SharePoint without having to download documents to your PC.
- Edit documents in SharePoint, saving time on downloads and uploads.
- Clean up specks, hole-punches, and alignment problems on scanned documents with one-click tools.
- Easily edit document properties as part of a business workflow.
- Collaborate with co-workers and change notes right in documents, saving time on long e-mails and follow-up.
- The two-click Scan-to-SharePoint tool saves minutes on each scanned document.

Vizia Previewer

Save time when navigating SharePoint directories by previewing TIFF, PDF, Word, and other document types in your browser with this free, downloadable tool. It instantly makes searching for and finding documents quick, easy, and efficient.

How Vizia SP Saves You Money

- Vizia SP eliminates the need to install and maintain client desktop software thus reducing IT administration costs. This is possible because it is 100% zero-footprint, running in the browser with no applets, active x, or other client software to download and install.
- Vizia SP was developed for SharePoint, works with its permissions, and is easily customizable, saving on development costs.
- Vizia SP replaces desktop image viewing, annotating, and editing software for most employees, so there's no need to buy and maintain programs such as Adobe Acrobat™ Professional or proprietary TIFF viewers.
- Vizia SP reduces network bandwidth costs associated with uploading and downloading image documents, and keeps viewing lightweight by only downloading the part of the document being viewed.
- Vizia SP slashes licensing costs and integration time associated with other enterprise content management (ECM) tools.

Free

Vizia Scan-to-SharePoint for Kodak Scanners

Eliminate scanning's tedium with a simple, seamless, and free solution to get documents from any Kodak scanner with Smart Touch functionality into SharePoint with just two clicks. Vizia Scan-to-SharePoint eliminates 70 percent of the steps usually required to get a document from a scanner to SharePoint.

Vizit SP Requirements & Licensing

Technical Requirements

- Windows Server 2003 or Windows Server 2008, 32-bit or 64-bit
- Windows SharePoint Services (WSS 3.0) or Microsoft Office SharePoint Server 2007 (MOSS 2007)
- Internet Explorer 6, 7, or 8; Firefox 1.5, 2.0, or 3.0; Safari; Chrome
- SharePoint server administrator access required for installation.

Licensing

- Vizit SP is licensed per server and per Client Access License (CAL). A server license authorizes the Vizit SP server to be on one physical or virtual SharePoint web front end. A SharePoint installation with multiple servers and multiple web front-ends (a server farm) will require multiple licenses for each web front end.

About Atalasoftware

Atalasoftware, Inc. is the creator of Vizit SP™ and DotImage® providing imaging technology to ISVs, systems integrators, and enterprises.
